

Case Study

The Enabling Specialists 24:7

Project Name: Olympic Park

Location: London

Project Value: £22M

Erith are proud to have been involved with the evolution of the Olympic Park in Stratford from the outset. As well as undertaking a substantial **asbestos removal programme** from redundant industrial buildings and their subsequent **demolition**, Erith have provided **specialist remediation advice** in the early days, before **designing bespoke remediation systems** and also undertaking the **ground water remediation**.

Erith are now involved in enabling the park infrastructure with the **deconstruction** of two major redundant bridges. Following **detailed preparation** and **temporary works**, involving close liaison with both Network Rail and the Highways Agency, the majority of activity is concentrated into short weekends of round the clock intense activity.
