

Case Study

The Enabling Specialists 24:7

Project Name: Pfizer

Location: Sandwich

Project Value: £4M

Erith continue to build on their excellent 10 year relationship with Pfizer, having carried out work at their facilities in Sandwich in Kent, Corby and now, at Pfizer's request, on the European mainland.

As well as extensive **asbestos removal** Erith's scope of work includes **testing for contamination** and the subsequent **remediation and decontamination** of major manufacturing facilities prior to **dismantling** them.

Pfizer, as a world wide pharmaceutical industry leader, demands the very highest standards not just in health, safety and environmental practices but also in commercial, professional and managerial processes and we are pleased to announce that Erith achieved **9 out of a possible 9** in Pfizer's most recent 2 yearly Contractor Competency Assessment.
